

Redosier Dogwood

Cornus sericea

Characteristics

Solar Exposure:

Height: 5 to 15 feet

Bloom Color: white

Description

Redosier Dogwood (*Cornus sericea*) is native to most parts of the US and all of Canada. Typically found in wet meadows, along streams, and on riverbanks, Redosier Dogwood is easily identified by its bright red bark and white four-petaled flowers. A shrub growing 5'-15' tall it can be distinguished from similar looking willows by its opposite branching form.
